Maryam
MERN Stack Developer

## PROFILE
MERN Stack Developer focused on scalable, secure, production-ready web applications.
Builds clean architecture systems with responsive UI and maintainable backend logic.

## CONTACT
Phone: 03057161188
Email: marium142005@gmail.com
LinkedIn: linkedin.com/in/marium-javed-316203387
GitHub: github.com/maryam142-lab
Availability: Internship / Junior Developer Roles | Remote Opportunities

## PRIMARY SKILLS
- React.js: Used in 6+ projects to build responsive component-based UIs
- Node.js: Built backend services with authentication, CRUD, and validation
- Express.js: Designed RESTful API routes and middleware architecture
- MongoDB: Applied data modeling and query design for scalable apps
- JWT Authentication: Implemented token-based auth flows and protected routes
- Tailwind CSS: Built consistent UI systems with reusable utility patterns

## OTHER TOOLS
JavaScript \(ES6+\), HTML5, CSS3, SQLite, bcrypt \(Password Hashing\),
Git & GitHub, Postman, Vite, VS Code, REST API Development

## HERO VALUE SUMMARY
- Built 5+ full-stack applications with production-ready patterns
- Designed REST APIs with secure JWT authentication
- Focused on scalable architecture and maintainable code quality

# PROJECTS

A production-ready blogging platform with secure authentication and dynamic content management.
Key Features: JWT auth, bcrypt hashing, CRUD posts, comments, likes, REST APIs, SQLite.
Metrics: 100+ posts handled | Secure token auth flow | Modular API structure
Architecture: Frontend React+Tailwind | Backend Node+Express | DB SQLite | Auth JWT+bcrypt
Live: https://blog-phi-wine-41.vercel.app/
Code: https://github.com/maryam142-lab

Interactive quiz app focused on state management and UI responsiveness.
Key Features: timer system, score summary, dark/light toggle, dynamic hooks updates.
Architecture: Frontend React+JavaScript | Backend N/A | DB N/A | Auth N/A
Live: https://quiz-project-qwvq.vercel.app/
Code: https://github.com/maryam142-lab

Responsive utility app demonstrating component-based architecture and preference handling.
Key Features: real-time operations, theme persistence \(localStorage\), voice input, mobile UI.
Architecture: Frontend React+JavaScript | Backend N/A | DB localStorage | Auth N/A
Live: https://calculator-beta-lilac-79.vercel.app/
Code: https://github.com/maryam142-lab

# EXPERIENCE TIMELINE
08/10/2024 - 15/10/2024 | Full-Stack Blog Platform | MERN Stack
- Architected secure auth and authorization workflow
- Implemented CRUD, comments, likes, and modular backend structure
- Designed REST APIs and responsive React+Tailwind UI

08/09/2025 - 10/09/2025 | Calculator App | Frontend
- Designed responsive calculator with theme toggle and voice input
- Optimized state handling and localStorage preference persistence

# OTHER CODE PROJECTS
Freelancing App | Smart Enterprise Management System | Hospital Management System | SyntcxHub
